Professional Summary

Talent professional with 7 years of experience improving recruiting systems through process redesign, analytics and automation. Consistently identified operational gaps, from pipeline bottlenecks to workflow inefficiencies, and translated them into scalable processes, dashboards and automation adopted by recruiting teams. Expertise in stakeholder management, SLAs and KPI definition, and leading recruiting teams.

Career Highlights

- Conducted root cause analysis on funnel data that identified a 75% candidate drop-off at the assessment stage, leading to a process redesign that reduced time-to-hire from 45 to 20 days. (Remoti)
- Rolled out a company-wide knowledge base and standardized English assessment adopted by the full recruiting team, eliminating a 2-week shadowing onboarding process. (Full Stack Labs)
- Redesigned a hiring process from 8 stages to 3 by replacing simultaneous panels with an async recorded case study, solving a cross-functional scheduling bottleneck that was consistently losing candidates mid-process. (Blackboard)
- Built an automated offer letter system adopted as team standard, eliminating manual document generation across the staffing operation. (BairesDev)

Work Experience

Remoti | Bogotá, Col

Jan 2024 – Jun 2026

Account Growth Manager (Recruiting Lead & Operations)

Global recruitment firm focused on building and scaling distributed teams for technology-driven organizations.

- Partnered with VP-level and C-suite stakeholders across client organizations, including VPs of HR, VPs of Engineering, CTOs and CEOs, to define hiring strategy, role requirements and success criteria for each search.
- Conducted root cause analysis on pipeline data that identified a 75% candidate drop-off at the assessment stage, leading to a process redesign adopted by the team that reduced time-to-hire from 45 to 20 days.
- Created a rule-based operational planning system (Pipeline Intelligence), deployed in Google Apps Script monitoring 30–40 concurrent roles across 3 client accounts and ~50 weekly candidates, directing recruiter focus automatically and increasing weekly throughput from 30 to 50 (+67%).
- Designed weekly KPI framework tracking CVs submitted, interviews conducted and interview-to-submission conversion rate. Set client-specific SLAs covering time-to-submit, time-to-hire and weekly candidate volume. Used pipeline data for capacity planning and workload balancing across the recruiting team.
- Automated recurring team workflows including candidate briefs, scorecards, salary documents and job descriptions from raw inputs, reducing manual documentation time across a team of 4 recruiters.
- Standardized client onboarding through a structured recruitment plan documenting process, a standard operational playbook, role requirements, sourcing criteria and SLAs for each account, replacing ad hoc intake calls with a consistent operational framework.

Full Stack Labs | Remote

Feb 2023 – Oct 2023

Senior Recruiter — Functional Team Lead

Global technology services company delivering engineering teams to enterprise clients.

- Designed and rolled out a centralized knowledge base using Notion and Loom, adopted by the full recruiting team and replacing a 2-week shadowing onboarding with a structured self-paced process.
- Implemented a standardized English proficiency assessment in partnership with internal language instructors, adopted across the company to address a recurring candidate quality issue at the client interview stage.
- Proposed and piloted an automated metrics system by exporting ATS data into CSV, replacing manual data pulls and giving the full recruiting team real-time visibility into performance by recruiter and role.

EPAM Systems | Bogotá, Col

May 2022 – Feb 2023

Recruiter

Global technology consulting company serving enterprise clients worldwide.

- Delivered full-cycle technical recruitment across Europe, the United States and Latin America.
- Created and deployed a technical enablement curriculum for the international TA team, standardizing role intakes and eliminating sourcing rework for complex engineering stacks.

Blackboard (Now Anthology) | Bogotá, Col

Apr 2021 – May 2022

Recruiter

Global education technology company with operations across the Americas.

- Collaborated with the CHRO and functional directors to redesign a hiring process from 8 stages to 3, solving a cross-functional scheduling bottleneck and significantly improving candidate experience through an async case study format.
- Designed a full internship program from scratch, process, structure and selection criteria, presented to and approved by the CHRO.
- Designed and delivered an IT recruitment training program to close technical knowledge gaps across the global TA team, standardizing role intakes, eliminating recurring rework caused by gaps in technology knowledge during role intakes and candidate evaluation.

BairesDev | Remote

Jun 2019 – Apr 2021

Staffing Analyst & IT Recruiter

Global technology staffing company providing engineering teams to international clients.

- Worked closely with Customer Success Managers and Sales Directors to prioritize open roles and align candidate pipelines with client delivery timelines.
- Built an automated offer letter system using Excel mail merge, adopted as team standard and carried forward as a process improvement to every subsequent role.

Education

Universidad del Rosario | Bogotá, Col

Jan 2024 – Oct 2025

Master's degree, Business Analytics | GPA 4.4/5.0

*Thesis: Designed an automated CV feature extraction pipeline (Python, PyMuPDF, spaCy, NLTK) and applied K-Means clustering to 800+ candidate profiles to identify hiring archetypes. Validated using silhouette analysis and PCA dimensionality reduction.***Pontificia Universidad Javeriana | Bogotá, Col**

Jul 2014 – Jun 2018

Bachelor's degree, Business Administration | GPA 4.2/5.0 | Honors: Best GPA, 7th semester cohort
